

IBT at Tec

- Laboratories equipped with state-of-the-art technologies
- Specialization in the diverse areas of Biotechnology
 - Technological innovation management
 - Biotechnological entrepreneurship
 - Development of research projects

Strategic partners

- FEMSA
- Nestlé
- Sigma Alimentos
 - Alpura
 - Bimbo
- La Moderna

Study abroad

- Texas A&M
- Harvard Medical School
- Universidad Politécnica de Madrid
 - University of Essex
- University of Melbourne
 - Rice University
- Institut Supérieur de Biotechnologies de Paris

Biotechnology today

- Provision of tools to solve the problems humankind currently faces.
- Production of functional and nutraceutical foods.
- Reduction in air, water and soil pollution.
- Food supply with new technologies for rural areas, among others.

Specialize

- Nanobiotechnology
- Biopharmaceuticals
- Medical Genetics and Genomics

Your future

- Pharmaceutical industry
- Food and beverage industry
- Biotechnological entrepreneurship
- Agri-food sector
- Environmental sector
- Research and innovation centers

Did you know that... at Tec, more than 90 patents have been generated in the area of biotechnology, including patents for AH1N1 vaccine production, and cancer and infection treatments based on natural compounds extracted from beans and avocado?
