

IQ at Tec

- Nationally and internationally accredited program
- Entrepreneurship based on the innovation and development of chemical products
- Incorporation of cutting-edge technologies
 - International internships

Strategic partners

- Heineken
- Schlumberger
- Alfa Energía
 - Xignux
- METALSA
 - BASF
 - AHMSA

Study abroad

- Hamburg University of Technology
 - Technische Universität Berlin
- Karlsruhe Institute of Technology
 - Victoria University
- École polytechnique fédérale de Lausanne
 - McGill
 - Texas A&M
- University of British Columbia

Chemical engineering today

- The chemical industry must incorporate the latest technological advancements into its productive processes in order to be competitive and be able to meet the needs of society.
- Development of new products and processes.
 - Reduction in the environmental impact of industrial activities and efficiency in the use of materials and energy in productive processes.

Specialize

- Innovation and Development of New Products
- Risk Administration and Management in the Chemical Industry
- Renewable Energies and Energy Efficiency

Your future

- Pharmaceutical industry
- Food and beverage industry
- Petrochemical industry
- Cement and construction materials industry
- Metallurgical industry
- Production of plastics and advanced materials
- Alternative fuels and energy production
- Textile industry

Did you know that... the Tec Chemical Engineering program is accredited both nationally (CACEI) and internationally (ABET)?
